	Industrial Applicability (IA)	Claims	1	YES
		Claims	2-7	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-7 lack an inventive step under PCT Article 33(3) as being obvious over McAtee et al (US 5,301,320) in view of Feulner et al (EP 0615198).

McAtee et al teach methods for defining, executing, monitoring and controlling the flow of business operations wherein a designer defines a workflow by providing a template of business activities that express the manner in which these activities relate to one another. This includes setting parameters, identifying resources and decomposing the business process into an ordered description of discrete goals wherein the goals can represent a business task or activity or the occurrence of a specific event. Further, the goals are classified into particular types, which are equivalent to classes and arranged in a template. The template relates the classes and provides a network of decisions. The path through this network provides arcs and utilizes messaging. This provides support for the work in process as elements of a computer-based system. The performance of the tasks is orchestrated in accordance with the template and this integrates various application software, which provides support of the work of the process in elements of a computer-based system. McAtee also teaches that tasks are partitioned among various users and computers. Once the tasks are partitioned the result would have been multiple persons in differentiated roles. See the abstract, figs. 2-3, 5, col. 2 line 33 to col. 5 line 5 of McAtee.

While McAtee does not specifically teach the use of data and decision objects, the goals in McAtee perform gathering of data and making decisions. Moreover, Feulner et al. specifically teach the use of business objects, entity groups and related data objects which helps provide a consistent view of data across a business, reduces redundancy and enables sharing of data. See the abstract, figs. 1, 3-6 and their corresponding description in Feulner. Thus, it would have been obvious to those of ordinary skill in the art to modify the teachings of McAtee to include those of Feulner for the advantages of consistency, redundancy reduction and sharing.

IMPORTANT NOTIFICATION

Applicant

KONNERSMAN, PAUL M.

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the 1. international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

V.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
	citations and explanati ns supporting such statement

1.	STATEMENT			
	Novelty (N)	Claims	1-7	YES
	• • •	Claims	NONE	NO
	Inventive Step (IS)	Claims	NONE	YES
	mvonave sup (10)	Claims	1-7	NO NO
	Industrial Applicability (IA)	Claims	1	YES
		Claims	2-7	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-7 lack an inventive step under PCT Article 33(3) as being obvious over McAtee et al (US 5,301,320) in view of Feulner et al (EP 0615198).

McAtee et al teach methods for defining, executing, monitoring and controlling the flow of business operations wherein a designer defines a workflow by providing a template of business activities that express the manner in which these activities relate to one another. This includes setting parameters, identifying resources and decomposing the business process into an ordered description of discrete goals wherein the goals can represent a business task or activity or the occurrence of a specific event. Further, the goals are classified into particular types, which are equivalent to classes and arranged in a template. The template relates the classes and provides a network of decisions. The path through this network provides arcs and utilizes messaging. This provides support for the work in process as elements of a computer-based system. The performance of the tasks is orchestrated in accordance with the template and this integrates various application software, which provides support of the work of the process in elements of a computer-based system. McAtee also teaches that tasks are partitioned among various users and computers. Once the tasks are partitioned the result would have been multiple persons in differentiated roles. See the abstract, figs. 2-3, 5, col. 2 line 33 to col. 5 line 5 of McAtee.

While McAtee does not specifically teach the use of data and decision objects, the goals in McAtee perform gathering of data and making decisions. Moreover, Feulner et al. specifically teach the use of business objects, entity groups and related data objects which helps provide a consistent view of data across a business, reduces redundancy and enables sharing of data. See the abstract, figs. 1, 3-6 and their corresponding description in Feulner. Thus, it would have been obvious to those of ordinary skill in the art to modify the teachings of McAtee to include those of Feulner for the advantages of consistency, redundancy reduction and sharing.
